

A new-to-the-world NIOSH certified N95 healthcare particulate respirator for exposure control, breathability & comfort

A Unique Design

3M™ Health Care Particulate Respirator and Surgical Mask 1870

- Meets CDC guidelines for *Mycobacterium tuberculosis* exposure control
- Consult OSHA regulations and CDC guidelines for the appropriate use of an N95 respirator for potential inhalation exposure sources such as Anthrax
- Features unique, new, 3M-patented flat-fold/three-panel design and advanced electret media technology*
- Reduces wearer exposure to airborne particles smaller than 0.1 micron—appropriate for laser and electrocautery procedures

NEW

For Every Breath You Take

The truly unique, 3M-patented flat-fold/three-panel design of the 1870 respirator and surgical mask gives it a comfortable fit unlike any other,¹ while reducing exposure to *M. tuberculosis*. Since it's both a respirator and a surgical mask, and fits most face sizes and head shapes, it is the perfect choice for standardization to a single respirator for use in the OR and throughout the rest of the facility.

And because it comes from 3M, a worldwide leader in respiratory protection products, you know you'll have reliable protection with *every breath you take*.

- Meets ASTM's highest level of fluid and splash resistance—reduces the risk of wearer contact with blood and body fluids
- Provides >99% bacterial filtration efficiency (BFE)²—helps reduce patient contamination caused by exhaled microorganisms
- Lightweight, off-the-face, collapse-resistant design provides greater comfort and breathability
- Unique, three-panel design molds securely to face and leads to better fit testing
- Low profile—offers convenient storage and portability
- Soft, conformable nose clip adjusts easily for a custom fit that helps create a secure seal
- Soft inner lining is comfortable against the face
- Universal—one size fits most face sizes and shapes
- Latex- and fiberglass-free; hypoallergenic
- Individually packaged in sealed pouches to ensure product integrity during storage and transport

3M Health Care

For customer choice, 3M offers other N95 particulate respirators

The 3M™ Health Care Particulate Respirators and Surgical Masks 1860/1860S also meet CDC guidelines for *M. tuberculosis* exposure control. They offer the same level of respiratory filtration efficiency as the 1870 respirator and can be used for the same procedures.

- Cone-molded design with soft inner shell is comfortable against the face
- Available in regular and small sizes to fit a variety of face shapes and sizes
- Packaged stacked and unwrapped for quick and easy dispensing
- Reduces wearer exposure to airborne particles smaller than 0.1 micron—appropriate for laser and electrocautery procedures

A full line of protection

3M Health Care has a full line of respirators that offer a high level of convenience, comfort, and, most importantly, protection. Each and every respirator we make is designed to help reduce healthcare professionals' exposure to potential airborne microorganisms such as *M. tuberculosis*, as well as help protect patients against the risk of exhaled microorganisms.

Fit testing

3M offers fit testing equipment as well as training materials and services to help meet OSHA training regulations for the use of respirators.
