

3M Nexcare™ PRODUCTS

Bringing you a technologically and medically proven product line that's trusted by hospitals and doctors and backed by 3M innovation.

The Nexcare™ Brand has benefited from the focus on technology and innovation by 3M.

This focus means that Nexcare™ products are durable yet gentle and are designed to be applied directly to even the most sensitive skin, providing comfort and fast healing when it's needed most. The products in the Nexcare range were originally developed for use by Hospitals but are now available for use at home.

Nexcare brings you products that feature ultimate comfort combined with high quality materials, to help you feel better and get on with your active life. You can be assured that the quality and reliability of Nexcare™ products is guaranteed. 3M developed the core technology platforms now seen in these cutting-edge products: Micropore™ Gentle Paper Tape, Sensitive Skin Silicone Tape, Steri-Strip™ wound closure systems, Coban™ self adherent wraps and Tegaderm™ film dressings.

Please note: Packaging may differ in-store to what is displayed in this catalogue. For further information, please call 3M on 1300 363 797.

Nexcare™ Dressing Selection

Which Nexcare™ products?

Wound injury or Support	MILD	SEVERE
 Cut	Any suitable wound strip (Waterproof, Comfort, Soft 'n Flex, Active)	Tegaderm™ Film Dressing
		Non-Stick Pad and First Aid Tape
		Steri-Strip™ Skin Closures
 Scrape/Graze	Any suitable wound strip (Waterproof, Comfort, Soft 'n Flex, Active)	Tegaderm™ Film Dressing

 Minor Burns, Blisters, Small Incision (i.e. Injection Site)	Any suitable wound strip (Waterproof, Comfort, Soft 'n Flex, Active)	Tegaderm™ Film Dressing
		Non-Stick Pad and First Aid Tape
 Stitches, Surgical Incision, Skin Tears	Steri-Strip™ Skin Closures	
 Securing Dressing, Tubing or Other Medical Devices	Any suitable First Aid Tape or Tegaderm™ Film Dressing	
 Eye Protection	Opticlude™ Orthoptic Eye Patch	
 Sprains, Strains & Compression	No Hurt Wrap (Coban™ LF Self-Adherent Wrap) or Athletic Wrap	
 Injury Protection & Sports Support	Stretchfix Underwrap	Sports Rigid Strapping Tape

Waterproof Strips Range

Provides protection by sealing around the wound blocking out water, dirt and germs to help promote a moist wound healing environment.

Product Benefits

- › Waterproof so fewer changes are required
- › Breathable, ultra-thin material bends and flexes with movement
- › Diamond shape seals the area and minimises edge lift
- › Soft, absorbent pad won't stick to wounds.

Suggested Applications

Cuts and grazes, scrapes, blisters and minor burns.

Micropore™ Tape Rolls and Dispenser

A gentle paper tape which is breathable, comfortable and hypoallergenic.

Product Benefits

- › Gentle to the skin
- › Easy tearing
- › Porous
- › Highly breathable to maintain skin integrity
- › Holds well on damp skin
- › Conformable
- › Hypoallergenic
- › **LATEX FREE.**

Suggested Applications

Securing simple or non bulky dressings. Ideal for repeat use with elderly patients and sensitive skin.

Suggested Applications

Can be used to apply pressure and absorb lightly bleeding wounds.

Steri-Strip™ Skin Closures

Sterile, adhesive skin closure strips used to close lacerations, cuts, incisions or skin tears.

Product Benefits

- › Painless alternative to stitches
- › Made of porous non woven backing material
- › Helps reduce scarring
- › Fast & easy application
- › Comfortable to wear
- › Reduced likelihood of skin irritation
- › Supplied in sterile individually packaged cards
- › **LATEX FREE.**

Suggested Applications

Closing cuts, surgical incisions and skin tears.
Wound support following stitches or staple removal.

Minor injuries, aches, sprains, strains, bruises or following operations such as dental procedures.

Frequently Asked Questions

Advances in treatment – Moist Wound Healing

Some wounds are best treated by transparent film dressings such as Nexcare Tegaderm™ and Waterproof Wound Strips which create a moist (not wet/soggy) wound healing environment. Moist wound healing is a different approach to wound care and is a result of advances in treatment methods developed in hospitals.

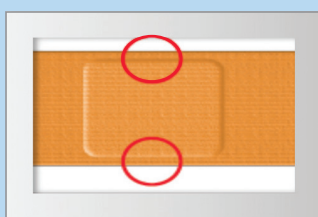

Benefits of Moist Wound Healing

- Creates a moist healing environment for minimal scarring (as no dry scab forms)
- Minimal pain as nerve endings are protected by the moisture
- Maximum healing speed as the absence of a scab makes it easier for new skin cells to move to the wound surface.

The Nexcare™ Difference

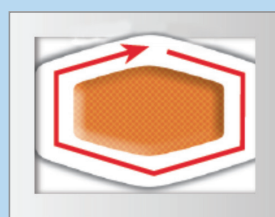

The Tegaderm™ film dressing was the key to developing a high performing wound strip, with a difference! Nexcare's moist wound healing process occurs with the help of the polyurethane film that features microscopic holes: small enough to keep out germs, water and dirt; big enough to let the skin breathe and allow the oxygen to facilitate the wound's natural healing process.

Traditional Wound Strips vs Nexcare™

Traditional Strip

Narrower adhesive seal around the sides can let in dirt and germs.

Nexcare™

Waterproof Diamond shape provides an effective all around adhesive seal against germs to help you heal faster with less scarring.

Tegaderm™, Tegaderm™ + Pad, Waterproof Strips and Tattoos

Q Is the material in these products just plastic?

A No. The material in Tegaderm™, Tegaderm™ + Pad, Waterproof Strips and Tattoos have a shiny appearance similar to plastic but it is actually made of a material called polyurethane. Polyurethane is microporous (has many microscopic holes in it) which allows the skin to breathe, yet keeps just the right amount of moisture in the skin and stops the wound from drying out. You will notice that it is flexible and moves just like skin when it is on.

Q *How can Tegaderm™/Waterproof Strips & Tattoos be microporous and breathable yet still remain waterproof?*

A Water particles are larger than air particles and as such are unable to pass through the tiny holes in these dressings.

Q *I don't like the sight of looking at the wound through a transparent dressing such as Tegaderm™. What should I do?*

A Instead, you may use a Tegaderm™+Pad dressing or a Waterproof Strip dressing which has a non-stick pad that covers the wound. Alternatively, Tattoos are a fun way for both big and little kids to forget their wounds! You can also use a No Hurt Wrap (Coban™ LF Self-Adherent Wrap) bandage to wrap over the dressing.

Q *Why are the 3M Nexcare™ film dressings (Tegaderm™, Waterproof Strips and Tattoos) a better solution than traditional wound coverings and strips?*

A Film dressings create an enhanced healing environment which blocks out water, dirt and bacteria whilst allowing excess fluid to vapourise. This moist wound healing allows for faster healing and less dressing changes – improving healing time and customer satisfaction.

Q *How do I apply Nexcare™ Wound Strips?*

A

1. Clean wound thoroughly
2. Pull wrapper apart
3. Grasp end tab and peel bandage off wrapper without touching the sterile pad
4. Apply to wound, pressing firmly (around the edges not the wound bed); strip will not stick if repositioned
5. Remove paper frames at openings once strip is applied.

Q *How can I help a bandage or wound dressing stick to my skin better?*

A After you have washed the wound area, pat the area around the wound dry before applying the bandage or wound dressing. After it's on, avoid rubbing the bandage or dressing or exposing it more than necessary to any liquids.

Q *How do I remove a bandage/tape that will not release easily from the skin?*

A If a bandage is not easily releasing avoid pulling on the bandage, instead work a little baby oil or cooking oil into the adhesive to help the bandage release from the skin. Or use ice (covered with a paper towel) for 5 minutes or less. Ice will make the adhesive brittle, which may cause it to release.

Q *I have fragile skin and I am worried about taping. What should I use?*

A To secure a dressing, use either Silicone Sensitive Skin Tape or Micropore™ Gentle Paper Tape as they are very gentle, breathable tapes. However, if you wish to avoid taping altogether, you can substitute with a No Hurt Wrap (Coban™ LF Self-Adherent Wrap) bandage, which has no adhesive and will not stick to the skin.

Q *Where do I go for more information on Nexcare™ products?*

A You can visit our website - www.nexcare.com.au for up-to-date information on new products, first aid tips, more FAQs, product videos, offers, where to buy information and much more.

Comfort Strips – Brights, Blue and Soft 'n Flex

***Q** What are Comfort Strips made of?*

A Comfort Strips are composed of the following 3 main components:

1. An elastic, non-woven backing made of polyurethane fibres
2. An acrylate adhesive
3. An absorbent pad consisting of rayon fibres or a blend of rayon and polypropylene fibres with a polyurethane non-stick surface.

***Q** What makes Comfort Strips “breathable”?*

A The backing material itself is porous so the bandage breathes all over, unlike conventional plastic bandages which only breathe where there are holes. Also, the unique hole pattern provides over 50% more hole area over the wound pad than conventional plastic bandages to allow air to reach the skin and excessive moisture to evaporate.

Steri-Strip™ Skin Closure Dressings

***Q** How long can Steri-Strip™ Skin Closure Dressings be worn?*

A Steri-Strip skin closures can be worn as long as they stay on or as directed by a health care professional. If they begin to loosen, remove and apply a new strip(s).

***Q** Do Steri-Strip™ Skin Closures contain Fibreglass?*

A No. Steri-Strip Skin Closures are made of porous, non-woven, elastic or rigid material coated with hypoallergenic adhesive. They are reinforced with filaments for strength (where packaging denotes).

***Q** Can you swim or bathe while wearing Steri-Strip™ Skin Closures ?*

A Yes. For additional protection, cover with a Waterproof Wound Strip or a Tegaderm™ Transparent dressing.

No Hurt Wrap (Coban™ LF Self-Adherent Wrap)

***Q** Can I re-use No Hurt Wrap (Coban™ LF Self-Adherent Wrap)?*

A No.

***Q** Can I wash No Hurt Wrap (Coban™ LF Self-Adherent Wrap)?*

A No, No Hurt Wrap (Coban™ LF Self-Adherent Wrap) will lose its elastic fibres if washed.

***Q** Does No Hurt Wrap (Coban™ LF Self-Adherent Wrap) contain natural rubber latex?*

A No, No Hurt Wrap (Coban™ LF Self-Adherent Wrap) is latex free.
